

FRBRized for an improved user experience! Find, identify, select and obtain materials with TLC's industry leading discovery solution.

Expect more from your public 'discovery' layer. TLC continues to deliver leading edge automation with their FRBRized view within CARL•Connect Discovery

The next generation of user services aligns the richness and authority of your library meta-data with the familiarity and performance of today's most trusted commerce websites.

- Dynamic algorithm connects same intellectual content as you catalog!
- Flexible and intuitive interface allows library staff to make additional connections, or disconnect, linked content.
- Assignment of a Trusted Record supports user discovery!

Why should we care about this fresh, new way to create, display and view titles within CARL•Connect?

- The FRBRized view displays a single entry for a work instead of numerous entries for each format and edition, making cumbersome search results a thing of the past.
- Findability! Grouping together multiple editions and formats of a bibliographic record gives your users a clear and trustworthy view of what you have in your library collection.
- Navigation is a breeze! Your users will no longer have to sift through hundreds of individual records to find the one they want.
