

# Extreme Makeover: Data Edition

Increase your Data's Value and Curbside Appeal with TLC's Data Solutions

**Metadata** **→ Purify** **→ RDAExpress**

Title records come from all sorts of places:

- Other Libraries
- Publishers
- Third-Party Vendors
- RDA Sources
- Non-RDA Sources
- Original cataloging

**Pre-Rinse**

**Fixes Structural Issues**

- Empty Fields or Subfields
- Invalid Leader Codes
- Missing Control Numbers
- Missing Indicators

Inputs up to 20 RDA fields including:

- Format (33x)
- Characteristics (34x, 38x)
- Relator Terms
- And more!

**Scrub**

**Data Enrichment**

- Genre consolidation
- Correct subject thesauri codes
- Convert obsolete series field
- Update subject form subdivision

**This Data Could be Yours...**

**New Customers** have their metadata improved every time TLC builds a new database, such as when customers migrate to Library•Solution v5.x.

**But wait, there's more...**

**Automatic Purify and RDAExpress Integration in Library•Solution v5.x** means that every time a record is added into a Library•Solution database via TLC's award-winning LS2 Cataloging, the record moves through the enhancement and cleanup process.

**Records originally created in LS2 Cataloging are always RDA!**

The amount of time it would take **5 full-time** catalogers to manually convert half a million (**500,000**) title records from AACR2 to RDA.

**vs** \*

The time it takes **RDAExpress** to complete the same amount of work.

*\*Based on the rate of one title record every 45 minutes per cataloger each working 8-hour shifts and doing nothing but converting records*
