

Libraries Reimagined
Virtual Conference
October 25-27, 2021

TLC's Annual User Group Conference

TLCU, our annual user conference, is an opportunity to network with fellow librarians, along with learning about software updates and future development. This conference gives you and your library the chance to meet with TLC's Subject Matter Experts (SMEs), Support, and Customer Success Managers to address personal library needs.

What really makes this conference unique is TLC's customers, presenting their best practices and sharing their ideas. Plus, each library has the opportunity to serve on the TLCU Steering Committee to help plan this yearly event. Before COVID-19, TLCU was held in various cities around the US: Tempe, AZ; Louisville, KY; St Louis, MO; and most recently, Salt Lake City, UT. In 2020 TLCU went virtual, offering the same user experience just as it did in person. This virtual format will continue in 2021.

Whether it's your first time or your tenth, TLCU is not to be missed. Consider joining the hundreds of librarians that make this conference a yearly practice to learn all they can about the applications they use every day.

TLC libraries can visit their Community site to learn more about **TLCU 2021 - Libraries Reimagined.**
